DETAILED ACTION

Reasons for Allowance

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 21, 26, and 31 have been carefully considered. Prior art of record fails to teach the combination of claimed elements including a network topology display having multiple connections between network nodes; the nodes having multiple connections to other nodes; multiple connection paths, each representing one connection with another node; portions of the connection paths overlapping with portions of other connection paths such that only one of the connection paths is visible in the network topology display as recited in claims 1, 21, 26, and 31; a distinguishing segment for indicating connectivity between a displayed node and only one of other two nodes by providing a sense of direction to a first connection path between the displayed node and one of two other nodes as recited in claim 31.

Eick et al (US 6,154,212) discloses an interactive network interface for displaying nodes representing components in a network. Eick teaches first and second connection paths representing connection to other nodes; the connections are represented as lines; the lines may be segments, arcs, or 3D curves. Eick fails to teach or suggest multiple connections overlapping other connections such that

only one is visible, and a distinguishing segment to indicate connectivity between two nodes and provide a sense of direction to the first connection path.

Bates et al (US 6,072,490) discloses user interface components for permitting user access to data stored in a computer. Bates teaches a user interface for displaying linked records with node elements representing individual records and link elements representing the links connecting the nodes. Bates teaches segments that overlap portions of other connections. Bates fails to teach or suggest that only one of the multiple connections is visible, and a distinguishing segment to indicate connectivity between two nodes and provide a sense of direction to the first connection path.

Conclusion

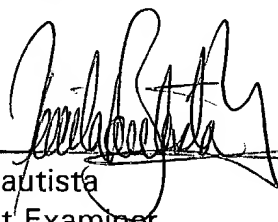

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
